

## ABOUT YIP 2023/24

Once again we on the team at YIP eagerly awaited the arrival of this year's participants. After weeks and months of preparation, it is a real joy to welcome this wonderful and dynamic group of unique individuals. Filled with questions and interest towards the world, each other, and themselves they have dived courageously into the 10-month journey of YIP here on the stunning lands of Ytterjärna.

In the design of this year's curriculum we worked with a number of questions: How can we educate our capacity to build a diverse and thriving community? What inner work is needed to enable this and how can this be fostered out of freedom? How do we find the will to build healthy routines in our lives? What does being human mean in a technological age and how can we practice our human qualities? How can we identify the untrue, warped, and one-sided narratives that many of our laws and systems are based upon and make space for new impulses and lively imaginations of future possibilities? These and many more form the basis of the contributor-led courses and mentor-led practices that run throughout the YIP program. We are very grateful to be able to explore these and many more questions with this year's YIP group.
