

Conference languages
DE/EN

Dear Colleagues,

We would like to invite you to a changed format for the eurythmy therapy specialist conference.

In 2026, we will be fully integrated into the week of the annual conference and will meet four times separately as part of the overall programme. This is a purely specialist group for eurythmy therapy (in German and English).

The meetings will be organised as follows on all days: After a short keynote lecture and introductory exercises, we will engage in an inter-collegial exchange. We would ask all participating colleagues to contribute their experiences and questions from their own practice. Together we would like to work on the configuration of the human constitutional elements, especially with regard to movement diagnosis.

Please let us know by email if you can present your own cases:

hana.adamcova@medsektion-ikam.org

Unit 1

16 September:

Sleep disorders and nervousness

Unit 2

17 September:

Self-harming behaviour and eating disorders

Unit 3
